3. The role of the NFEP&WM in supporting municipalities in Poland

Examples of the NFEP&WM support for municipalities:

- *Support for projects contributing to the implementation of the EU climate and energy package.*

The NFEP&WM implements Advisory project for municipalities which want to introduce emission reduction actions on their territory e.g. low emission plans and low emission investments. Some of them are signatories of Covenant of Mayors. The project is financed by EU under Operational Program Environment & Infrastructure (estimated project costs – EUR 30 million for years 2015-2023). The NFEP&WM is a Project Implementation Unit which has been working since April 2015. The project is implemented in cooperation with regional partners.

4.1 Financing instrument - Operating Programme Infrastructure and Environment 2014-2020

Action 2.1: Adaptation to climate change

- **Type of project 2.1.5: Systems of rain water management at urban areas**

I contest:

7 projects, projects cost a. 500 mln zł, funding: 278 740 000 zł

II contest:

12 projects, projects cost a. 390 mln zł, funding: 298 329 252 zł

III contest:

pending
